OSL 3

zinc oxide	18.9
lithium carb.	8.7
dolomite	3.6
bentonite	2.7
rutile	0.9
silica	32.3
strontium carb.	5.0
custar feldspar	27.9

100.00

FIRING SCHEDULE temps are given in farenheit

1 SIMPLE fire to 2220 hold 20 minutes. Drop temp to1850 hold from 1 to 4 hrs.

2 large center ring with border. fire to2229 hold 20 minutes. drop temp to 1650 hold 10 minutes.

raise to 1900 hold 3 hrs. drop to 1650 hold 10. raise to 1900 let cool

Schedules are continually being changed and reversing the hold positions on #2 creates a crystal with a small center ring inside a wide one.

Thanks for sharing this. I work at ^8/9 usually, but it will be nice to try a lower fired crystalline glaze.
